

ALUMNI MENTORING & ENGAGEMENT MANAGEMENT SYSTEM

SASHRIKA REDDY ALIMITY
25WU0102248

ABOUT THE PROJECT

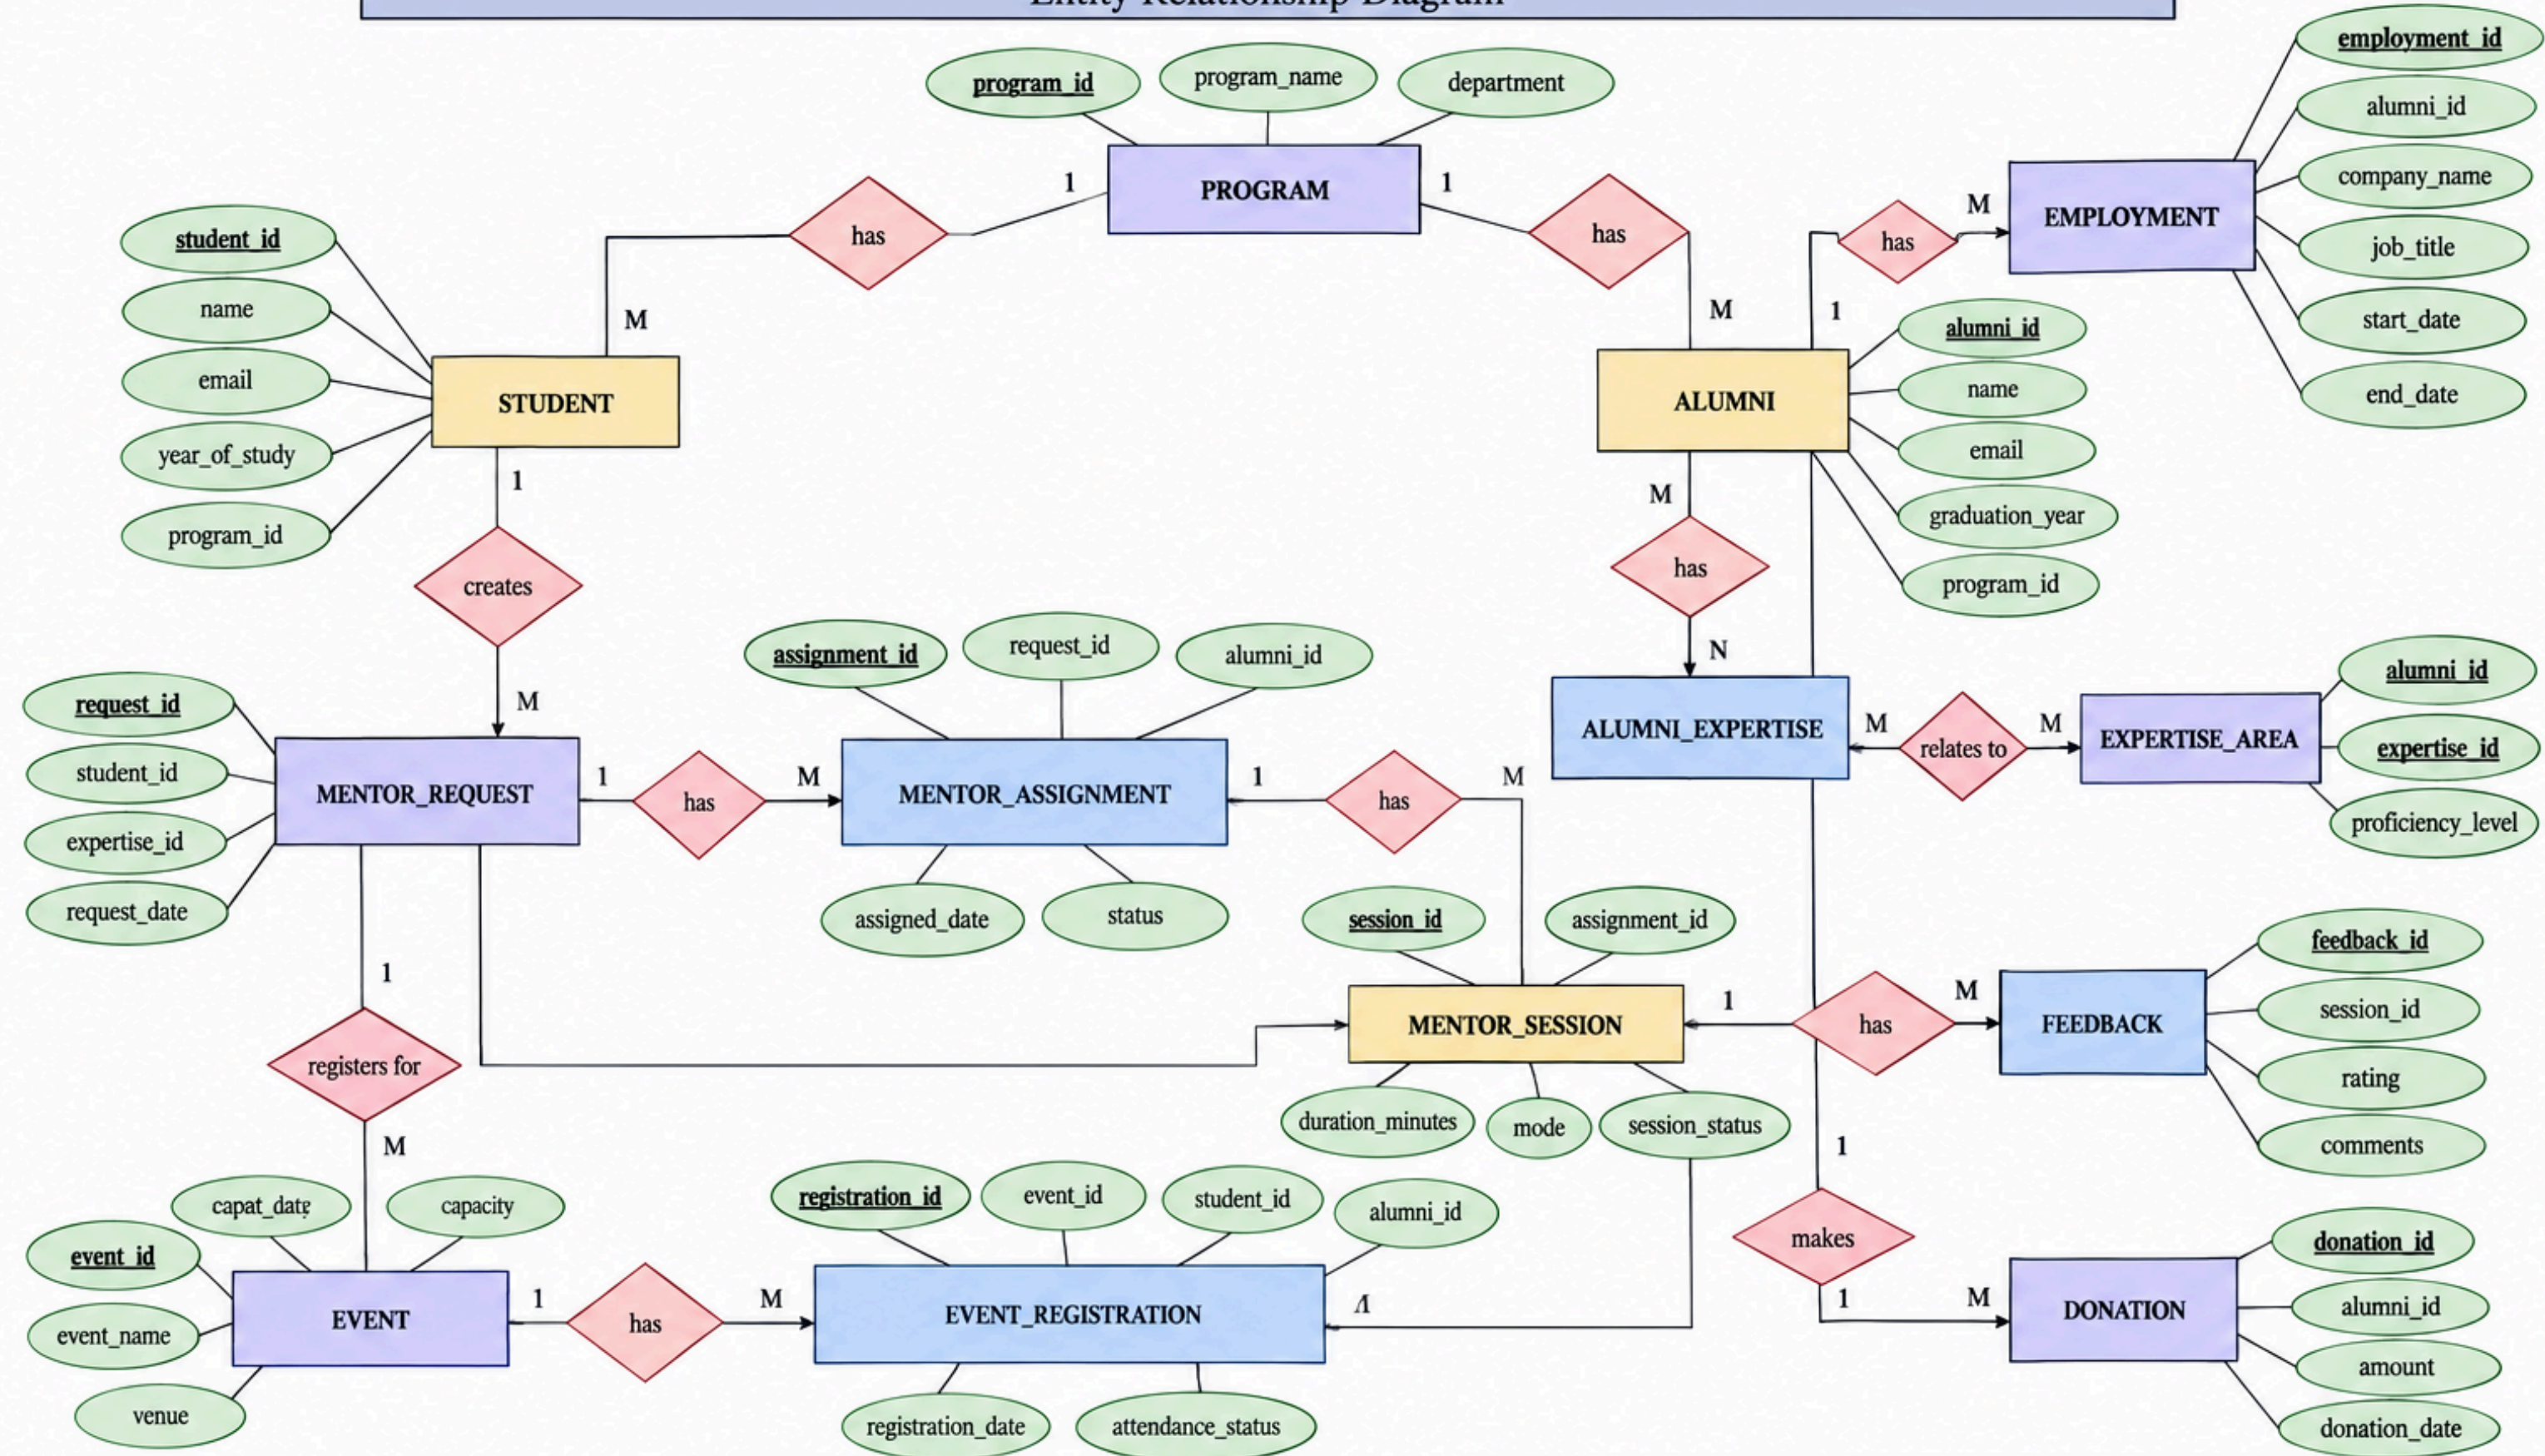

The project is a relational database system designed to manage interactions between students and alumni.

What does the system manage?

- Student & Alumni Profiles – Stores academic and basic information.
- Mentoring – Manages mentor requests, mentor assignments and mentoring sessions.
- Expertise & Careers – Records alumni expertise and employment history.
- Events – Manages events and student/alumni registrations.
- Donations – Maintains alumni donation records.
- Feedback – Stores feedback from mentoring sessions.

Alumni Mentoring and Engagement Management System

Entity Relationship Diagram

- Notes:**
- Primary keys are underlined.
 - Cardinalities (1, M, N) are shown near the relationship lines.
 - Each student or alum can register for multiple events.
 - Each mentor request can have multiple assignments, but only one active at a time (enforced via constraints).

DATABASE DESIGN

The database consists of 13 interconnected tables:

- Program
- Student
- Alumni
- Employment
- Expertise Area
- Alumni Expertise
- Mentor Request
- Mentor Assignment
- Mentor Session
- Event
- Event Registration
- Donation
- Feedback

student_id	name	email	program_id	year_of_study
1	Aarav	student1@gmail.com	1	1
